

## ROLE DESCRIPTION – SOUND TECHNICIAN

<b>Reporting to</b>	Senior Technician/ Stage Manager
<b>Responsible for</b>	Operating all aspects of Sound in onboard entertainment areas & any technical/staging support as instructed by the Senior Technician/ Stage Manager
<b>Role Overview</b>	The role of the Sound Technician is to operate all aspects of the sound system(s) in various entertainment venues for rehearsals, shows, special events and other activities in order to assist in the delivery of the creative product to the required high standards. The role must support the whole technical production team onboard which includes staging requirements and daytime duties as per the rota and senior technicians wishes.

### Specific Responsibilities

- Operate sound for all main production shows and rehearsals and other areas onboard the ship as required
- Carry out microphone checks, sound checks and general maintenance
- Ensure that shows are operated to a high standard using pre-designed production books
- Operate sound in all other venues including on deck and in secondary lounges
- Under the direction of the Senior Technician/ Stage Manager, carry out any general technical assistance as required including weekly general cleaning and maintenance of technical equipment
- Under direction of the Senior Technician/ Stage Manager, meet with guest entertainers and certain groups to find out their audio-related requirements for upcoming shows and activities
- Ensure the correct usage and storage of technical and staging resources, reporting any faults, damage and/or replacement requirements to the Senior technician/Stage Manager
- Assist with any technical or staging requirements for daytime activities, stage set ups, pack downs etc. as per the rota and Senior Technician/ Stage Manager wishes alongside the other members of the technical team
- Take accountability and accept responsibility for the maintenance and/or any damage to technical equipment and be responsible for reporting this to your superiors
